

**Producer:** Prima Protein AS

**Country of origin:** Norway

## Product Description

Prima LT is a premium-quality fishmeal produced from fresh, chilled wild-caught pelagic fish. A gentle two-stage indirect drying process preserves protein functionality and nutritional quality, and a natural antioxidant is added to stabilize the finished product.

The production facility operates in accordance with HACCP principles and meets all requirements for quality-assured operations. Each production batch is analysed by an independent accredited laboratory to confirm chemical composition and microbiological safety.

All fish used in this product originates from responsibly managed stocks regulated by national fisheries authorities. No fish species classified as endangered by recognized conservation authorities is used.

## Product applications

Prima LT fishmeal is a premium-quality ingredient, rich in highly digestible proteins and essential minerals, making it an excellent choice for both animal feed and aquafeed applications.

## Product Specifications

Parameter	Specification
Protein	Min. 68 %, typical 70 – 73 %
Fat (Soxhlet)	Max. 13 %
Moisture	Min. 6 %, max. 10 %
Ash (salt-free)	Max. 14 %
Salt (NaCl)	Max. 5 %
Total Volatile Nitrogen (TVN)	Max. 0,18 % NH <sub>3</sub> -N
Water-soluble protein	Min. 18 %, max. 32 %*
Cadaverine	Max. 1,0 g/kg (1000 ppm)
Histamine	Max. 0,5 g/kg (500 ppm)
Antioxidant	Natural antioxidant is added after milling
Salmonella	Not detected
Contaminants	EU limits
Quality of raw material	TVN max. 50 mg N/100g
*Fishmeal made from Sand eel and Mackerel accepted up to 38 %	

**Shelf Life:** Minimum 12 months when stored dry at ambient temperature.

**GMO Statement:** The product is not derived from genetically modified organisms (GMO).

**Packaging:** Bulk delivery / 1000 kg bags.
